

Efficient and Effective IT Solutions

With a proven track record of delivering cloud-first, data-driven, and AI-enabled solutions, Sfoures LLC specializes in modernizing enterprise systems and driving digital transformation. We provide end-to-end services including cloud migration, application modernization, data analytics, and agile program management—helping organizations enhance existing systems, optimize operations, and meet evolving business and federal requirements.

Our Mission: Innovation, Excellence, and Client Success

Our Team: Diverse Minds. Proven Expertise. Measurable Impact.

- Certified experts with deep technical and domain expertise
- Cross-functional teams delivering best-in-class solutions
- SMEs focused on measurable impact and client success

OUR CORE SERVICES

AI /ML Solutions

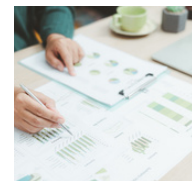

- Build intelligent systems that automate workflows, analyze large datasets, and generate predictive insights.
- Enhance efficiency, improve accuracy, and enable smarter, data-driven decisions.

Cloud Migration

- Cloud migration from on-premise to Public Cloud (AWS, Microsoft Azure, Google Cloud).
- Cloud based services including but not limited to (IAAS, SAAS, PAAS, IPAAS etc)
- Migration planning, Architectural design, Environment setup
- Cloud Strategy and provide support in Public Cloud setup
- Deployment setup including CICD, pipeline etc.

Data Management

- Data Architecture & Engineering
- Data Lakehouse
- Data Governance
- Business Intelligence
- Data Integration & Interoperability
- Data Security & Compliance

Clients and Partners include:

GSA MAS Pool

GSA MAS Contract #: 47QTCA24D00FX

SFOURES LLC PAST PERFORMANCE

U.S. Customs and Border Protection

Cloud Migration and Data Management

Modernization and Database administration of e3 portal to collect and transmit biographic, encounter, and biometric data of individuals encountered by U.S. Border Patrol. Data Integration between ICE and CBP database using DMS.

Federal Maritime Commission

Enterprise Data Lake

Designed Enterprise Data Lake Proof of Concept for the Bureau of Trade Analysis using Open Source and Azure based technology stack. Established the reference implementation for their Data Lake Product in Azure Cloud.

Agency for Healthcare Research and Quality

Target State Assessment

Current assessment of their QSRS application and providing target state recommendation in AWS Cloud using AWS Cloud Native Services like Containerization and Data Analytical Capabilities.

U.S. Census

Infrastructure Services

Provide target State recommendation in AWS Cloud for their CEDSCI Delivery system using Cloud native and Cloud agnostic Services. Built Shared Service Infrastructure using EKS Clusters and Kafka to support Census business applications and Department of Commerce

Department of Transportation - Surface Transportation Board

Data Management Services

Prime Contractor working on the implementation of their Data Management Services using AWS Ecosystem. Built Data pipelines to obtain the national rail road carriers data and ingested into their Data Management ecosystem and built a data portal using Huwise to provide the data access to their stakeholders.

Fannie Mae

Cloud Migration

Successfully migrated 90+ applications from on-premises to Cloud. Provide Enterprise Architecture and Solutioning support across the various capabilities. Successfully built Enterprise Data Lake and retired legacy data warehouses

Navy Federal Credit Union

Data Integration

Designed and implemented scalable big data processing pipelines using Hadoop, Spark, and other distributed computing using RDD technologies to process 800+ terabytes of data for Current Expected Credit Losses project. Designed and developed several data integration projects on Teradata platform.
